Monday to Friday

Client Car Parking

Access via Customs St West or Quay Street
Please contact reception on 09 358 2555 ext 7600 to pre-book a car park.

Buddle Findlay has two allocated parking areas (visitors and basement carpark). When booking a carpark, you will be notified which carpark area you need to enter and given a carpark number.

Both carparks are located on street level and can be accessed via the driveway (shown in orange on the map below), either from Quay Street or from the back of the building on Customs Street West.

The **visitors carpark** is located closer to the Quay Street end of the driveway and the **basement carpark** is directly under the PwC Tower.

For the visitors carpark: If travelling from Customs Street West, as you pass the loading bay on your right hand side, the visitors carpark entrance is the next right turn opposite the M Social Hotel. If travelling from Quay Street, the visitors carpark entrance is the first left turn before going under the building.

At the entrance, press the intercom 'on' button then '1' and '8' to call reception. Reception will direct you as to which carpark to park in on the left hand side. After parking, take the lift up to the level 17 on the lift control board, it will direct you on which lift to enter. When exiting the carpark, the barrier will automatically open when driving towards the exit gate.

For the basement carpark: If travelling from Customs Street West, the basement carpark entrance is located directly under the PwC Building and is the second carpark entrance on the right hand side. If travelling from Quay Street, the basement carpark entrance is the second carpark entrance on the left hand side after the loading bay.

At the entrance (when you reach the roller gate), push the intercom button which will call reception to lift the gate. Travel down the ramp and directly in front of you is clearly marked Buddle Findlay client car park signage. Reception will give you directions as to which space to park in. In front of car park 19 is the internal lifts (take the lift straight up to level 17). When returning to your car, take the lift down to level 2, you will need to push the intercom button at the gate to be let out again.
